

CPHQ Study Course

Nebraska Office of Rural Health and Nebraska Association Healthcare Quality Risk & Safety are providing a 'free' educational opportunity for rural hospitals in Nebraska. They are working collaboratively with the Critical Access Hospital Networks and other stakeholders across the state to provide education for rural hospital staff to prepare for the Certification Professional Healthcare Quality Exam.

Stakeholders – Rural Networks

- Alegent Critical Access Hospital Network - Omaha
- Saint Elizabeth Regional Medical Center CAH-Link - Lincoln
- BryanLGH Medical Center Critical Access Network - Lincoln
- Regional West Medical Center Rural Network – Scottsbluff
- Saint Francis Regional Medical Center Rural Network – Grand Island
- Good Samaritan Hospital Rural Network – Kearney
- Nebraska Hospital Association
- CIMRO of Nebraska

The CPHQ workshop is designed to offer detailed information about Healthcare Quality concepts, resources and tools.

It also is a preparation course for those planning to take the Certified Professional in Healthcare Quality (CPHQ) examination. The course will follow the exam matrix and will help you focus your study efforts. Participants are encouraged to take the CPHQ study workshop, review the CPHQ training manual, and then take the CPHQ exam. We strongly recommend participation in all three workshops in order to receive the full 12 hour training.

CPHQ Workshop Details
